Interactive table

Quickly summarize data

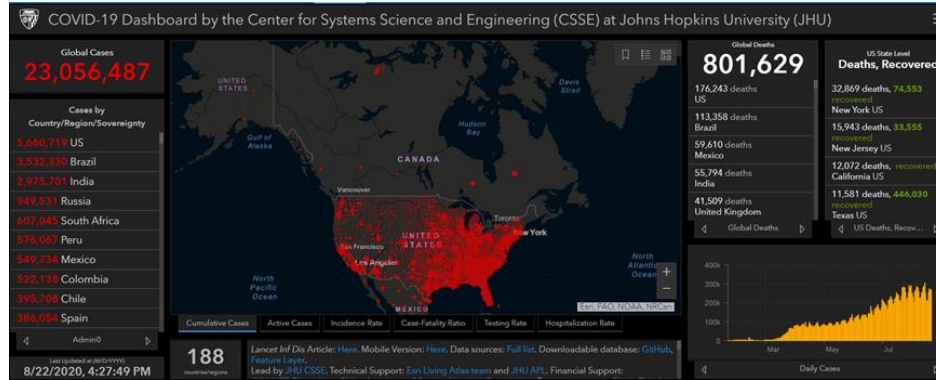

Data exploration

The screenshot displays an Excel spreadsheet with a PivotTable and the PivotTable Fields task pane. The PivotTable is located in the center of the spreadsheet, with the text "PivotTable2" above it. The text "To build a report, choose fields from the PivotTable Field List" is displayed below the table. The PivotTable Fields task pane is on the right side of the spreadsheet. It has a title bar "PivotTable Fields" and a close button. Below the title bar is a section "Choose fields to add to report:" with a search box and a list of fields: "Cost" and "Product". Below this list is a link "More Tables...". Below the "Choose fields to add to report:" section is a section "Drag fields between areas below:". This section has four areas: "Filters", "Columns", "Rows", and "Values". Each area is represented by a box with a corresponding icon (funnel for Filters, vertical bars for Columns, horizontal bars for Rows, and a summation symbol for Values).
